

Maximum Performance.
Ultimate Protection.
One Device.

Watchdog Service

Internet management, security, monitoring, and optimization service.

Clarity's Watchdog Service™

As a VoIP based Hosted PBX – known more commonly as Cloud Phone Service, we strive to help local businesses succeed by leveraging personalized cloud communication solutions. We work as the professionals responsible for the critical telecommunications technology that connects you with your customers. Our Watchdog Service™ ensures all your internet connected devices operate at top performance with added protection from outside threats.

Clarity's Watchdog Service™ isn't just powerful, it's designed with real business in mind. With so much on the line, you can trust that our technically certified Watchdogs never take your business safety and performance lightly. We understand that each industry has its own set of requirements and risks. That's why we offer a tailored service to ensure your business is protected from today's predators and load balanced for top performance.

With the speed of change in business today, it's hard to know if your Internet Service Provider (ISP) is delivering all the speed and quality you purchased or to keep up with the many ways intruders can harm your business. Subscribing to Clarity's Watchdog Service™ you can rest assured we'll be proactively monitoring, so you can focus on realizing your vision.

Watchdog Benefits

Single System

One device for Quality of Service (QoS) & supreme performance for your office network.

Safeguards ALL Devices

Supports all internet connected equipment; phones, POS, payment processing & computers.

Easy Implementation

Our equipment is easy to use, and we'll personally talk you through installation & activation.

Maximize Performance

Apps priority management with Quality of Service & Traffic Steering deliver top performance.

Failsafe™ Voice & Video

Our SD-WAN service protects your voice & video calls between internet provider failures.

Software Updates

We'll instantly update Watchdog & provide network tuning support to maximize performance.

Personalized Support

NEVER talk to a machine. Technically certified advisors are available at a moment's notice.

24/7 Failsafe™ Monitoring

Clarity's central monitoring proactively watches your network & ISP connections performance.

Service Upgrades

Our service packages & device options make it easy to upgrade & grow your business.
